Monday March 11, 1878.

At Sea, Atlantic Ocean.

Weather generally clear with passing showers of snow and hail during the day. The wind blowing a fresh breze at beginning of the day from the N^d and W^d, increasing to a gale, and hauling S. by W. until 8.10 A.M. when a thick squall of rain and wind, accompanied by a single flash of lightening and peal of thunder passed over the ship, and about five minutes after the wind hauled, without warning, to N.W. catching the topsails slightly aback. The ship paid off rapidly and the yards laid square, the wind hauling slowly to W.N.W. and settling in that direction

the ship running from the wind under close reefed fore sail, fore and main t'gallant sails, fore t'gallant staysail. Moderately heavy sea. At 5.30 P.M. the wind blowing very heavy in squalls and with a rough sea; clewed up and furled close reefed fore t'gallant sail, furled double reefed fore sail, hauled down and stowed fore t'gallant staysail, braced up the after yards on the starboard tack, hauled out main trysail and set storm mizzen, and brought the ship to, bracing up the head yards and hauling out the foot of the fore trysail to meet her. Ship lying to under the above mentioned canvas coming up to S.W. and falling off to S × E. At 8.10 P.M. took in close reefed main t'gallant sail. Ship easy. Rough sea.

Friday, March 29, 1878.

At Sea, Mouth of the English Channel.

Weather overcast drizzling rain, misty threatening weather. Blowing a heavy gale from the N.W. and E.N.E. Very heavy sea. Ship rolling heavily but easily. Sail on ship at noon;- single reefed fore storm staysail, lee clew of close reefed main topsail, mizzen stay-

sail, and storm-mizzen. At mid. set fore storm stay-sail, mizzen staysail, main trysail, storm mizzen. Several sail in sight under close canvas, hove to. At 10.30 A.M. the lashings of the starboard lower boom worked adrift and the boom went overboard. At the same time the ship gave a heavy lurch to leeward, and the wheel took charge carrying away four of the spokes. From 4.00 to 5.00 P.M. Engaged in rearing ship to N.N.W. Set fore sail and fore storm staysail to pay her off, and then took them in again. At 4.50 P.M. Geo. H Young (O.S.) fell overboard from the bow-sprit, while engaged in stowing the fore topmast staysail. It was impossible, owing to the state of the sea, to lower a boat; a balsa and two life-buoys were let go, he was unable to catch them and was drowned. At 11.50 P.M. kept away and ran to leeward of a vessel, on whom we were apparently drifting; came to to leeward of him.

Lorient, France. "Bassin de L'Eure".

Pleasant with mist around the
morning first part of the day, overcast and
drizzling rain latter part. Inward bound
mail Str. "Canada" arrived from the United
States. At 8.00 A.M. visited Engineer Offi-
cers Quarters on the ship, the ship Co.
finding it down at that time. At 9.30
A.M. "Called all hands to Quarters", and the
Divisions were inspected by their Officers.
At 10.00 A.M. "Sent to Quarters for Muster"
the crew and ship were inspected by
the Captain, after which, the "Articles for
the Future Government of the Navy" were read

formed of a crew of the R. L. sailing Frigate Institution 3rd Cut

by the Captain. Afterwards had a general muster of the Ship's crew. The following men were absent without leave, viz:- Felix J. Thomas (O.S.), Wm Baker (Cox.) Pat. Dawson (O.S.) Jas. McLain (Quart.) Chas. O'Neill (Sea.), John Neal (B.M.) and Abraham Stricker (Pte.). Abraham Stricker (Pte.) returned on board 10 hours over time. The R.L.S. "Portsmouth" failed to follow the movement of the Squ. Off. ships by not piping down Hammocks at the usual time.

English Channel.

Clear and pleasant, happy
around the horizon, ship steering N.W. by N.
under all plain sail to t'gallantsails
with the wind E.N.E. About 2.15 A.M.
suddenly discovered a cliff looming
up dead of the bows and appearing
from just forward the lee beam to
well on the weather bow. At the first
instant the cliff appeared the Officer of
the Deck called the Navigators attention
to it and almost immediately the
ripple of the waves on the beach was
heard. Put the helm hard down and
the main was given to "let fly the head
sheets". About a minute after the ship
struck gently and brought up on bottom
having come to about three quarters of
a point under the helm. Braced every-
thing flat aback, and set Mizzen t'g-
gallantsail. The ship settled down
under the influence of back sail and
the current, about twenty feet going
over from the head which was thrown
over when the sails were braced aback
Hauled the mainsail partly up to get
a purchase on the yard-arm.

Got out the 1st cutter and launch
and hoisted out the stream anch
and heaviest kedge. Bent a 9 inch
hawser to the former and carried

under the command of Captain A.C. Badger, U.S. Navy. to the latter, and carried them out astern. The Navigator went out in a boat and sounded around the ship, and found 3 fathoms of water forward, 3 1/4 between the fore and main, 3 1/2 between the main and mizzen, and 4 fathoms aft. The speed of the ship was about six knots when she struck. The Captain, Navigator, and Pilot were called at 2.00 a.m. Immediately after she struck guns and rockets were fired, and coston signals burned, which attracted the attention of the Coast Guard, who came alongside about 4.00 a.m. and informed the Captain that the land was Bollards Point. Lieut. Very was sent ashore to telegraph for tugs from Portsmouth and Portland. Engaged fifteen men from shore to assist in getting the ship off. Wind light to fresh hauling to the S.E. and E.S.E. Sent down topgallant yards and masts. At 9.30 a.m. called all hands to muster and the Captain addressed the Officers and Crew. Hoisted out steam launch. A tug came alongside and was despatched for lighters. At 11.30 a.m. three tugs the "Lightning", "Telegraph", and "Commodore" came off, One of them towing three lighters. Hoisted the stern anchor, two guns & carriages, a case of Exposition goods, Steam Launch's boiler, and payed

the stream chain into one of them, and the starboard bower anchor and fifty fathoms of chain into another.

At 12.45 P.M. the Government tug "Malta" came down from Portsmouth Navy Yard to assist in getting us off. Ran two hawsers out astern, and one from each bow to the tugs, and at 1.45 P.M. manned the hawsers to the stream and kedge astern, and the tugs started ahead, but failed to move us.

At 2.30 P.M. the tug Admiral came down and offered assistance, which was taken. The hawser from the starboard bow was shifted to the head of the mainmast and the Admiral taking the Malta in tow, at 3.00 the tugs all started ahead. At 3.25 the ship commenced to move and at 3.30 came off. Expended a stream and kedge anchor, as we were obliged to cut the hawsers when the ship came off. Left one bad line and portion of another, and two seven fathom hand leads. Left our two launches and pilot cutter to be towed up by one of the tugs. The Government tug "Malta" took us in tow for Portsmouth.

At 6.30 P.M. parted her tow-line and came alongside and took another. In bracing up main yard sprung the main royal mast which was

under the command of Captain A.C. Badger, U.S. Navy;
up and down the mast.

Portsmouth, England.

Overcast, cloudy, dingling rain or mist. Calm to Moderate gale from the S.E. & E.S.E. At 2.00 AM. came to with port anchor and Mother Bank near Spit Head in fifteen fathoms of water veering to seventy-five fathoms on port chain. An Officer from the Coast Guard Station at Ryde came off to the ship during the forenoon. The Portsmouth Dock Yard Tug came off with an Officer who informed the Captain that the 1st Cutter had been swamped while going towards us. At 11.30 AM the Cutter was brought off by the Coast Guard who found her in Stokes Bay. At 2.00 P.M. have up our anchor and was taken in tow by Dock Yard Tugs who towed us up to Portsmouth Harbor where we made fast to a buoy with harbor and starboard chain. Twenty two men reported their term of Enlistment as having expired but were detained on board by order of the Captain

Overcast, cloudy, and hazy

Moderate breeze from the N.W. & E. Hauled in dinghy and unshipped gangway laddins. At 9.30 a.m. mustered at Quarters and found Chas. Lyon (C.Y.), Phillip Le Blanc (Sea) and Jas. H. Carlisle (O.S.) absent without leave. At 9.25 a.m. H.M. Stg "Malta" came alongside and at 10.10 she cast off and took two lines from our port bow. At 9.56 a.m. called "All hands muster Ship" and at 10.20 cast off from the buoy and towed out to sea. At 10.50 cast the jib T.Y. Staysail and Spanker. At 11.20 made sail to topgallant sails. Draft of ship forward 20 ft. 5 inches, aft 22 ft. 1 inch. At 12.40 P.M. the "Malta" cast off, rounded to with the after yards square. The Pilot left the ship, filled away and shaped a course W.S.W. At 1.00 P.M. took departure from Dinnan Point bearing (by C.) N.N.W½W. distant two miles. Stood down the Channel getting occasional casts of the lead. At 2.45 P.M. lost sight of land. By order of the Captain Mustered from confinement Jafnean Erickson (P.M.), Jos. Landis (O.S.), and Harry Collins (Sea.) Rigged out flying jibboom, and rig royal yards, secured anchors for sea. Passed several sail standing up and down the Channel. At end of the day the ship was under T.Y. Staysail, foresail, topsails fore and main topgallant sail, and main royals. Standing down Channel.

Saturday, February 1, 1879.

At Sea making passage from Portsmouth, Eng. to New York

Moderate, rainy, and squally most of the day, occasionally clearing up and then shutting in again. Having a stiff breeze from S.W. at the commencement of the day, hauling to the Westward as far as W.S.W. Heavy squalls. Rough sea first part of the day, moderating towards noon. Long regular sea at close of day. Ship rolling easily, but deeply at times. Steering full and by all day. At 9.30 a.m. hove to with the main-topsail to the mast and sent our pilot on board a Dutch barque bound in. Filled away at 11.20 a.m. A stowaway, Charles Haddon, a native of Bridgeport, Conn. was discovered, and by order of the Captain was taken up on the books for rations. At 12.00 mid. carrying fore topmast staysail, fore staysail, fore and main, and close reefed mizzen topsail; foresail and main trysail.

under the command of Captain A.C. Badger, U.S. Navy

Sunday February 2, 1879.

At Sea, bound from Plymouth Eng. to New York.

Weather generally pleasant and cool. Days around the barque latter part of the day; passing showers of rain about 4.00 a.m. Stiff breeze from the N.E. with heavy squalls, first part of the day, hauling to the N. and dying away to a calm between 5.00 and 6.00 P.M., and coming out light from the N.N.E. at 11.00 P.M. Rangin the first part of the day, moderating to a long swell at 5.00 P.M. Steering full and by until 6.00 P.M. No strange way from then until 10.00 P.M. after that steering a course N.N.W. At 3.45 P.M. an Austrian barque showed her colors, and made signal S.C.H. answered with H.N.K. & G.J.R. A steamer on the weather beam, during the afternoon, bound into the channel. Exchanged colors with a German steamer. Exchanged colors with the French Mail Steamer "Amerique" that run down and passed under our stern. Took in the patent log at midnight and set it at 0, it then reading 55 3/4 knots. Laid on ship at Mid. topsails topgallant-sails, courses, jib, and fore topmaststaysail.

Thursday, February 4, 1879.

At sea, bound from Portsmouth, Eng. to New York.

Cool and pleasant until 8.00 A.M., overcast, rainy, and squally after that. Madeira bears from the NNW. at beginning of the day dying away to a calm at 8.00 A.M., the wind then came out from the S.E. and E.S.E. and increased in force to a fresh gale at 4.00 P.M. dying away to a moderate breeze by 10.00 P.M. Steering a course first part of the day, full and by from 9.00 A.M. to 4.00 P.M. on the port tack, have to after that the close of day. Sea smooth until 8.00 P.M., moderate after that. Barometer commenced to fall at 10.00 A.M., and fell from 30.01 to 29.71 at 9.00 P.M., and rose to 29.74 at Mid. Diurnal variation noticed during the day. Sail as ship at Mid. Close reefed fore and main topsails, mizzen staysail storm mizzen and fore-storm staysail.

Thursday, February 6, 1879.

At Sea, bound from Portsmouth, Eng. for New York

Clear and pleasant first part of the day, overcast, misty, rainy, and squally, latter part. Fresh breeze from W.N.W. to S.W. with heavy squalls. Long sea most of the day, rough during the latter part; ship laboring easily. Barometer rose from 29.76 to 29.85 at 11.00 a.m. and then fell to 29.43 at midnight. Stirring fall and lay all day on the port tack. During the mid watch made a sail two points on the lee bow, but could make out no lights, run off to clear her, and when we got her astern she showed her lights. Passed a bargue during the forenoon standing to the S.W. Sail on ship at midnight;- double reefed fore, main, and mizzen topsails, single reefed foresail, mizzen staysail, storm mizzen, and foretopmast-staysail.

Sunday, February 9, 1829.

At Sea, bound from Portsmouth, Eng. to New York.

Pleasant weather, passing showers
ugly and threatening latter part of the day, with
occasional flashes of lightning on horizon.
Wind fresh & light from S.W. to W. with many
squalls. Long swell from the Eastward. Ships
lying to all day on starboard tack. Sent down
topgallant yards and made preparations for a gale.
Barometer fell from 28.98 at 1.00 a.m. to 28.70 at mid.
Remarkable instance of pleasant weather with
very low barometer. A barque in sight standing
to the Eastward. At 3.00 P.M. set close reefed
main topsail.

Thursday, Feb. 13, 1829.

At Sea, bound from Portsmouth, Eng., to New York
Pleasant weather with passing
showers. Blowing a fresh to heavy gale from
the N.W. and W.N.W. Ranges sea. Ship lying to on
starboard tack all day. Felt frequent and
heavy thumps under the quarter during the
mid and morning watches. At 9.30 A.M. dis-
covered that the midden head had twisted off
Made preparations to get spare topsail yard
across the poop to stow with a hawser. Bent
lines to midden chains and had them in-
board. At 1.00 P.M. sent down crossjack
yard, and lashed it across the knak of the
poop to be used as a fairleader for the midden
pendants. At 3.30 P.M. got a hawser around
the stern of the ship, and hauled it in taut
at the gangways to jam the helm hard down
and prevent it from yawing. At 4.00 P.M.
got the weather midden pendant adrift, had
the line bent to the pendant through a block
on the crossjack yard, hauled it taut, but it
parted. The hawser over the midden chafed through.
Got another hawser and put a piece of chain
over the midden to prevent chafe. Hove to midden
main topsail, double reefed fore topsail, and storm mizzen.

Friday, Feb. 14, 1879.

At Sea.

Weather generally pleasant. Fresh to strong gales from the 1st and 2nd decreasing in force towards night. Ship laying to until 9.00 P.M. Rolling deeply and easily in a rough sea. Rudder thumping badly. About 4.00 A.M. the lanyard around the rudder chafed. Passed it again. Engaged in fitting iron pendants, rudder rope, and tying rudder. At 8.30 A.M. caught the main rudder pendant and hauled it taut steadying the rudder a great deal. During the forenoon the barque "Sagitta" bound for Baltimore passed under our stern within hailing distance. Asked him to send a steamer to our assistance. Made signals B P J - H V - K P V the barque answered the last by C. and stood off to the S.W. About 5.00 P.M. got another light of claw over rudder, and brought the tails in through a forward upper deck port. Endeavored to sling the rudder but was unsuccessful. At 8.00 P.M. made sail to double reefed fore and main topsails, foresail, and foretopmast staysail, eased away on starboard lanyard and laid a course of S.W. Ship steering easily.

Saturday, Feb. 15, 1879.

At Sea.

Pleasant first part of the day, overcast and drizzling latter part. Fresh breze from the N.E. and N.N.E. Long sea. Ship rolling easily. At 7.00 a.m. shored down fore topsail and up main topsail, and hauled up courses, set stun sails and main stay sail. Drove a Norman bolt in the after part of the rudder, and put a right at chain over this, striking it on both sides. To this chain hooked iron pendants made of ridge rope and brought the ends through blocks on the crosspeck yards and clapped a tackle on the pendants. The hawsers were allowed to remain in case of accident. Made sail again and kept away, steering a course S.W. by S. Sail on ship:- Double reefed fore and main topsails, fore sail, fore stun sail and fore topmast stay sail.

Erie, under the command of Captain A.C. Badger U.S.N.

Friday, April 11, 1829.

Lisbon, Portugal; and "At Sea".

Weather clear and pleasant, with passing showers of rain about 10.30 A.M. Fresh breezes from the N.E. and N.W. with squalls. Unshackled from the buoy, and slipped at 7.15 A.M., having made sail to topgallant sails, beat down the Tagus River under charge of Pilot. At 9.00 A.M. hove to & discharged Pilot. At 10.30 unbent anchor chains. At 12. M. took departure Cape Espichel bearing (S.C.) E. by S. Cape Racha N.E. Bent fore and mizzen storm staysails and storm mizzen. Repaired hawse buckler that had been stove by sea. At Midnight, sail on ship, Comercio [illegible] Singh moped topsails, T.G.A. topgallant-sails. Fore topmast staysail.

Saturday, April 12, 1879.

"At Sea".

Clear and pleasant. Moderate & fresh breezes from N.N.W. to W.S.W. Discovered three boys, stowaways, named Antonio Mendes, Joao Pedro Cardoza, and Jose Ferreira.

During the forenoon shook out reefs out of topsails, and set Mizzen topgallant-sail. Took in reef in topsails and furled Mizzen-topgallant sail during the second dog watch. Full and by on starboard tack until 6.30 P.M. when wore ship and stood close hauled on port tack. Sighted one sail and a steamer.

"At Sea."

Sunday, April 13, 1879.

Pleasant with passing showers. Moderate breeze, with very heavy squalls, from N.W. to W.S.W. At 1.00 A.M. ship under Courses, singled reefed topsails, foretopmast staysail, and jib At 10.15 A.M. inspected ship and crew at Quarters. By order of the Captain, confined Wm Emory (O.S.) in double irons for purloining vegetables, and Arthur Striker (P.M.) for neglect of duty on post. At 12.30 P.M. took second reef in topsails; in so doing carried away the roping in weather leech of main topsail. Unbent it and bent new topsail taking in two reefs. Discovered that the first band inside the sheave hole of the jibboom had set back upon the horses, put on two oak battens to keep it in place, and strengthen the horses. At 6.15 P.M. wore ship and stood on port tack close hauled. Clear reefed foresail

"At Sea".

Monday April 14, 1879.

Weather generally pleasant passing showers. Wind moderate to fresh from North to N.N.W. with squalls. Ship under Single reefed foresail, close reefed topsails fore-topmast staysail, mizzen staysail and storm mizzen.

Mustered at Quarters at 9.30 a.m. In shaking reef out of main topsail a reef pennant jambed and in clearing it cut maintopsail. Cleared down and repaired and then set sail again.

Lima, under the command of Captain R. C. Badger U. S. N.

"At Sea".

Wednesday, April 16, 1829.

Clear and pleasant. Light breezes from the W.N.W. & North. Smooth sea. Under square sail to t'gallant sails, and fore topmast staysail. Sighted a sail during the night, hoist a green light in starboard gangway by order of Captain. Got a cast of the lead in 100 fathoms at 2.00 AM. Hauled up courses and braced aback the mainstaysail at 1.30 AM; filled away at 3.45 and set courses at Daylight made Madeira bearing SE by S½S and Porto Santo N W½W. Found a leak in the after head room. At 1.20 P.M. hauled by the wind on the port tack. At 1.50 P.M. tack up and stood S.S.W. By order Captain released from confinement Wm Emory (O.S.) and Adams Stiles (P.M.) and the stewards.

2 Emos, under the command of Captain A.C. Badger, U.S.N.

Wednesday April 30, 1829.

"At Sea."

Clear and pleasant, passing showers of rain between 4.00 + 5.00 a.m. Calm, and light to moderate breezes from North to South East. Smooth Sea.

Signalled with a Spanish barque during the morning watch. She was bound to Santiago de Cuba; asked our Lat. & Long. which was given her.

At. 9.30 A.M. mustered at Quarters and afterwards Exercised at divisional drills. By order of the Captain confined John Commons (Sea) and Wm E. Champion (P.M.) in double irons, the former for removing water from the scuttle-butt, and the latter for neglect of duty as past. Several sail in sight during the day. Steering a course. Under plain sail to royals, and jib as lower studding-sail.

Respectfully Subt.,
John N. Jordan,
Cadet-Midn.

Captain A.C. Badger, U.S.N.,
Commanding U.S.S. Constitution.

Examined
A.C. Badger
Captain Commanding

Monday May 5, 1879.

At Sea

Wather generally overcast and squally. Moderate to fresh increasing to a moderate gale from the S.W. and E.S.E. Dying out latter part of the day.

Passed quantities of seaweed during the day.

Shortened sail to close reefed topsails during the gale.

Journal of a cruise of the U.S.S. Constitution 3rd Rate. 2 Guns.

Gale of March 11th and 12th, 1878.

The barometer from Noon of the 10th to Midnight was comparatively steady, ranging from 29.78 in. to 29.74, and the wind varying in force from ten to twenty miles per hour. From Noon of the 10th to 12.00 P.M. the wind was steady in direction from N.N.W. At 12.00 P.M. it hauled to N.W. by N. and so continued till 1.00 a.m. of the 11th; and at 1.00 the barometer had fallen from 29.77 in at Midnight to 29.70, and continued to fall rapidly till it reached its lowest point 29.22 at 5.30 P.M. of the 11th. At 2.00 P.M. (the 11th) the wind had hauled to N.W. by W.; and at 3.00 P.M. to W., at 4.00 to S.W., and at 5.00 to S. by W., blowing a moderate gale. At 8.15 a.m. (11th) when it suddenly shifted to N.W. in a few seconds of time, the sudden shifting preceded by a thick squall of rain and wind, accompanied by a single flash of lightning, and peal of thunder. The wind settled in direction from W.N.W. at 9.00 A.M., and so continued till 2.00 P.M. when it hauled to W. by N. increasing in force to a full gale, blowing at the rate of 60 miles per hour. At 5.30 P.M. the ship was brought by the wind on the starboard tack, under storm sails. At 6.00 P.M. (11th) the barometer commenced to rise and continued to go up steadily till it reached 30.00 in at 9.00 A.M. on the 13th. The full strength of the gale lasted from 5.00 P.M. of the 11th, to 9.00 P.M. of the 12th, when it changed to a moderate gale, and so continued till the noon of the 13th, after which, fresh breezes with frequent squalls lasted for 24 hours. During the prevalence of the gale, several violent squalls accompanied with hail as large as pebbles passed over the ship

Lieut. C. M. Thomas,
Navigator.

Gale of March 29th, 1878.

This Gale, one of the severest nature, was preceded by a steadily falling barometer, calms and light-airs. The barometer commenced to fall at 2.00 P.M. of March 26th, when it stood at 30.21, and fell steadily each hour after, reaching 30.09 at midnight 26th; 29.89 noon 27th; 29.68 midnight 27th; 29.35 noon 28th; 29.01 midnight 28th; and at 5.00 a.m. of the 29th the barometer reached its lowest point, 28.92. From noon of the 26th to midnight of the 27th the force of the wind varied from calms to light airs, the general direction being from the North and West till midnight of the 26th, and from the South and East from noon till midnight of the 27th. Calms prevailed from midnight of the 26th till noon of the 27th. During the continuance of the calms and light airs, the sky changed frequently from entirely overcast to a perfectly clear sky; the form of clouds predominating being cumulo-stratus and cirro-stratus. From midnight, 27th, to noon, 28th, light to gentle breezes, sky overcast, clouds nimbus and cumulus, hazy, with occasional passing showers. From noon of the 28th to 8.00 P.M. the wind was moderate from the N.E. and E.S.E., at 8.00 o'clock the weather became threatening in appearance, with rain, the wind increasing in force and very squally; the barometer having reached 29.01 by midnight. The squalls were more violent in force after midnight, and by 7.00 a.m. of the 29th the Gale became furious. From 9.00 A.M. to 11.00 P.M., of the 29th, the wind blew at the rate of from 50 to 75 miles per hour. After 7.00 A.M. the ship "lay to" under storm sails and tarpaulins in the weather mizzen rigging. The seas were high and very heavy. At 6.00 A.M. of the 29th the barometer commenced to rise slowly but steadily reaching 29.46 by midnight. After 11.00 P.M. the

Gale decreased in force, and by noon of the 30th the Gale was moderate, and the Sea rough and irregular.

After 7.00 P.M. of the 30th the Gale broke, and the wind continued fresh from the Nd and Wd., the barometer rising to 29.89 by midnight. During the prevalence of the furious Gale the wind was steady in direction from N.E. from 7.00 am. to 3.00 P.M. (29th). hauling to N.E. by N. at 3.00 P.M., and remained so till 11.00 P.M., when it hauled to N.N.E., and at 3.00 a.m. (30th), to N. by E.; at 6.00 a.m. to North; at 10.00 a.m. to N.N.W.; and at noon the wind hauled back to North, moderating in force, and remaining steady eight hours. Passing showers of rain and hail not frequent during the Gale.
